

PROFESSIONAL SUMMARY

Experienced in web development and digital marketing, I specialize in creating and optimizing websites using WordPress, PHP, HTML5, CSS/SASS, and JavaScript. Proficient with tools like Salesforce Marketing Cloud, BitBucket, Figma, and Docker, I focus on delivering user-friendly websites and seamless email campaigns. I have strong expertise in integrating SEO best practices, utilizing platforms like WpEngine and FlyWheel for efficient site management. My background includes email development using HubSpot and ConvertKit, with cross-platform testing using Email on Acid. Through an agency, I contributed to projects for major companies such as Medtronic, Omega Therapeutics, and BridgeBio, ensuring their digital presence is impactful and optimized. With a collaborative approach, I thrive in fast-paced environments, always seeking to drive results and improve web and marketing strategies.

EXPERIENCE

Wordpress Developer - FREELANCE

Vince Design Studio LLC | Denver, CO

12/2023 - Present

- Developed and maintained custom WordPress websites for churches, local businesses, and sports clubs, improving online presence and user engagement.
- Managed SEO, content strategy, and social media marketing to enhance brand visibility and reach.
- Designed website assets in Figma, ensuring cohesive branding and a user-friendly experience.
- Conducted cross-browser testing using BrowserStack to guarantee compatibility across various platforms and devices.
- Debugged and optimized websites to improve performance, loading speed, and functionality.
- Proactively sourced new clients through cold calling and followed a structured sales cadence to generate business opportunities.

Wordpress Developer - FULL TIME

Experience Design Studios | Remote

02/2023 - 11/2023

- Collaborated with a team of developers and project managers to build WordPress websites for healthcare industry clients, including publicly traded companies like CVRX, BridgeBio, Omega Therapeutics, and Cytokenetics.
- Utilized PHP, HTML, CSS, JavaScript, and WordPress plugins such as Advanced Custom Fields (ACF) to develop robust, feature-rich websites tailored to client needs.
- Worked with the team to implement Docker in conjunction with WPVIP, enhancing the development and deployment process for enterprise-level clients.
- Designed and developed HTML email campaigns using HubSpot, ensuring cross-platform compatibility through testing with Email on Acid.
- Managed development and staging environments using WP Engine and Flywheel, ensuring smooth transitions from development to production.
- Collaborated with the SEO team to ensure all webpages were SEO-friendly by adding meta tags, titles, and descriptions, optimizing search engine visibility.
- Provided ongoing technical support for existing WordPress websites, resolving issues efficiently to maintain optimal website performance.

Wordpress Developer - INTERN

3:5 Creatives | Remote

10/2022 - 04/2023

- Collaborated in a fast-paced environment with the design and web development teams to build and launch over 10 customized WordPress websites for clients.
- Wrote clean, efficient code in PHP, HTML, and CSS for various projects, integrating WordPress plugins like Advanced Custom Fields (ACF) to enhance functionality and user experience.
- Utilized WP Engine to create and manage multiple development, testing, and production environments, streamlining website deployment and improving workflow efficiency.
- Built custom WordPress websites using Elementor page builder, ensuring responsive design and tailored user interfaces for client-specific needs.
- Designed and developed HTML email signatures in Photoshop, incorporating animation effects, and converted them into fully functional email signatures using HTML tables.
- Created a custom Elementor plugin for an eCommerce site, enhancing its functionality and improving the overall shopping experience for users.

Wix Developer - INTERN

Child's Cup Full | Remote

01/2021 - 02/2021

- Collaborated with a team of three to update and enhance the Child's Cup Full website, ensuring a modern and userfriendly design.
- Designed and created a wireframe using Figma, then translated it into a fully functional site using Editor X, improving site usability and design aesthetics.
- Conducted thorough research to identify scalable solutions for the website, ensuring smooth future development and scalability as the site grows.

Content Developer - INTERN

Lotus Meteor Shower | Aurora, CO

07/2019 - 05/2020

- Managed and published content on school news websites using WordPress, ensuring timely and accurate updates.
- Coordinated with writers and photographers to ensure seamless article publication, improving workflow efficiency across teams.
- Assisted writers in error-proofing content and supported photographers in capturing high-quality images, contributing to polished and engaging articles.
